This questionnaire will help you get a better idea of how ELMIRON is working for you. Before you begin treatment with ELMIRON, be sure to fill out the questionnaire below. Remember, ELMIRON may have a more gradual effect on symptoms – sometimes taking up to 3 months until significant improvement is seen. It's important to continue to take ELMIRON as your doctor has prescribed. After 3 months of taking ELMIRON, take the questionnaire again. By reviewing your answers, you and your doctor will be able to track your progress with ELMIRON.

### Instructions

For each question below, please circle the answer that best describes how you feel. Then, mark your score (0 to 4) for each answer in the column on the right. When you are finished, add up the numbers in this column for your total score.

	0	1	2	3	4	START OF THERAPY MONTH 1 SCORE	MONTH 3 SCORE
<b>1</b> How many times do you go to the bathroom during the day?	3-6	7-10	11-14	15-19	20+		
a. How many times do you go to the bathroom at night?	0	1	2	3	4+		
<b>2</b> b. If you get up at night to go to the bathroom, does it bother you?	Never	Mildly	Moderate	Severe			
<b>3</b> Are you currently sexually active? YES _____ NO _____							
a. IF YOU ARE SEXUALLY ACTIVE, do you now or have you ever had pain or symptoms during or after sexual intercourse?	Never	Occasionally	Usually	Always			
<b>4</b> b. If you have pain, does it make you avoid sexual intercourse?	Never	Occasionally	Usually	Always			
<b>5</b> Do you have pain associated with your bladder or in your pelvis (vagina, lower abdomen, urethra, perineum, testes, or scrotum)? If you do not have pain, please skip question 6.	Never	Occasionally	Usually	Always			
a. If you have pain, is it usually...	No Pain	Mild	Moderate	Severe			
<b>6</b> b. Does your pain bother you?	Never	Occasionally	Usually	Always			
<b>7</b> Do you have urgency after going to the bathroom? If you do not have urgency, please skip final question.	Never	Occasionally	Usually	Always			
a. If you have urgency, is it usually...	No Urgency	Mild	Moderate	Severe			
<b>8</b> b. Does your urgency bother you?	Never	Occasionally	Usually	Always			
						<b>TOTAL SCORE</b>

ELMIRON is indicated for the relief of bladder pain or discomfort associated with interstitial cystitis.

### Important Safety Information

ELMIRON has been shown to be well tolerated. The most common side effects were blood in stool, diarrhea, nausea, hair loss, headache, rash, upset stomach, abdominal pain, liver function abnormalities, and dizziness. When side effects did occur, they were generally mild and usually did not interfere with continuing treatment. Hair loss, when it occurred, was almost always limited to a single area of the scalp, and grew back when ELMIRON was discontinued. ELMIRON is a weak anticoagulant (blood thinner) which may increase bleeding. Call your doctor if you will be undergoing surgery or will begin taking anticoagulant therapy such as warfarin, heparin, high doses of aspirin, or anti-inflammatory drugs such as ibuprofen.

Please see the accompanying full Prescribing Information.
